Safes Catalogue

BTV is a family business established in 1962, with wholly owned subsidiaries in China (Jiaying) and Mexico (Cancun). BTV is the leading company in Spain for the production of mailboxes and safes for the hardware, DIY and security specialists sectors.

Our processes are certified by the standards ISO 14001 and ISO 9001, and with them we aim to ensure an immediate delivery from our central warehouse with over 1.500 references with 5.000 m².

BTV is a member of ESSA (European Security Systems Association) as well as AES (Spanish Association of Security Companies), and regularly tests its products in the European laboratories of reerence in its sector, such as APPLUS or Instituto Giordano. The majority of the high security safes in the range have recognised certifications by AENOR and ECB-S, according to EN-1143-1 and EN-14550 standards.

New BTV headquarters, inaugurated in 2018. La Puebla de Alfindén, Zaragoza.

Guide of safes

What type of safe do I need?

Type of installation

Free standing and high security safes

Quick and easy installation, with safes screwed to the wall and the floor.
The free standing and high-security safes are mounted by fixing them to the floor and the wall with anchoring bolts (provided as standard in all safes).

Free standing. Pages: 6 to 39
High security. Pages: 64 to 76

Wall safes

Access to the safe is made difficult because all its sides, except the door, are protected by the walls where it is mounted.
Building work is required for installation

Wall safes. Pages: 42 to 62

Depending on the resistance level to burglary/fire

Medium security

Body: up to 3 mm. thick. (standard is 2 mm.)
Door: **between 4 and 6 mm.** thick.
Lock: mechanical or digital electronic.

Free standing. Pages: 26 to 27
30 to 39
Wall safes. Pages: 58, 60 to 62

High security

Body: up to 4 mm. thick steel. (standard 2 mm. for embedding)
Door: **between 6 and 12 mm.** thick.
Lock: mechanical or electronic.

Free standing. Pages: 6 to 25
28 to 29
Wall safes. Pages: 42 to 57, 59

Double walled and certified

Body integrated by a double wall filled with reinforced concrete or fire retardant material.
Filled doors or 8mm minimum thickness steel sheet doors.
Some series are certified by the Standard UNE-EN-1143 on resistance to attacks with grades I to V.

High security. Pages: 64 to 70

Fire proof

Safes designed to protect documents and valuables in case of fire, for between 30 to 60 minutes. Double special anti-temperature concrete filled walls.

Pages: 72 to 76

Lock system

Mechanical

Key (High-security or Double bitted key)

Electronic

Electronic digital system plus motor.
Electronic digital system plus key.
Electronic digital system plus knob. (it does not require a key to open).
Electronic digital fingerprint system plus knob.

iSafe

i-Safe system

Manage your safe from your smartphone with our app

Multi-user: The safe administrator can activate or deactivate user access.

Who has used the box in your absence? The iSafe application displays the record of the last 300 events with date and time.

Manage functions easily and intuitively, for example changing codes, interior lighting, opening schedule delays, etc.

CUARZO

SERIES

The Cuarzo series stands out for its robustness and resistance to external attacks. Made of steel, its 12mm of thickness on the door and 8mm on the body gives it extra security.

Of sober design, this series is ideal for use in business: its interior dimensions allow to accommodate documentation A4 folio size (Models with 30cm background) and it has models with slot that are specially designed for that purpose.

It is also recommended to provide service in homes that require extra security.

Electronic models include automatic interior lighting as standard.

CUARZO

SERIES

Internal lighting with energy saving LEDs

Features

Door thickness:	12 mm.
Wall thickness:	8 mm.
Bolts:	6 to 8 x Ø25 mm. 3 sides.
Additional protection in the lock area:	with manganese steel anti-drill plate.
Colour:	Special mottled grey.
RA:	Slot 150 x 16mm.
Anchor holes:	3 wall / 3 floor - Ø12 mm.
Internal lighting:	with energy saving LEDs (electronic models).

Locking system

Models L:

Lock : High security double bitted key lock. Class A EN 1300.

Models E:

Lock : High security double bitted key, with additional release key (the key is always required to open the safe).

Electronic lock with:

1 User Code with 2-15 digits.

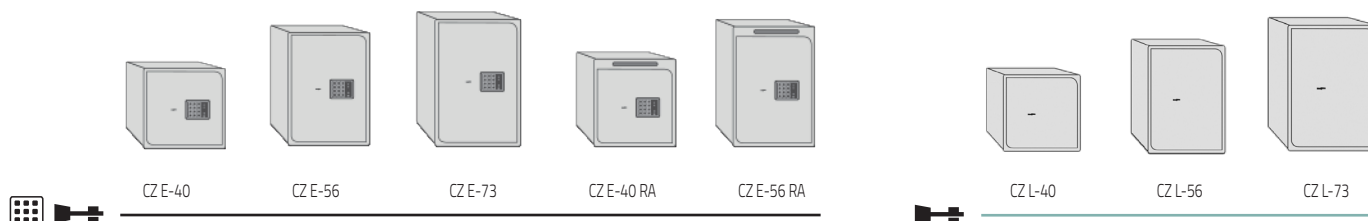

1 Emergency Code with 8 digits.

Delayed opening programmable between 1 and 99 min.

Power supply:

4 x 1.5V AA-size batteries included.

Low battery warning. External power outlet with 9V battery (6LR61).

RU E-56

RUBÍ

SERIES

Like the precious stone that gives it its name, the Rubí series combines beauty and hardness. Built in steel, its 10 mm thick door and frame and its 6mm body provide it great robustness. The striking violet color of the safes that make up the series and its minimalist aesthetic makes them ideal for using it in homes and businesses.

Thinking in this last function, several models with slot have been conceived, suitable for establishments where cash is handled. Also most of the models allow to accommodate folio and AF documents (Models with 30cm depth).

Electronic models include automatic interior lighting as standard

ZAFIRO

SERIES

In the image and likeness of the gem that gives it its name, the Zafiro series stands out for its resistance and its intense blue colour. Manufactured in steel, these safes have 8mm thickness in frame and door and 4mm in body that provides a high level of security.

Their versatility and features make them ideal for use in homes and businesses: their dimensions are specially designed to accommodate documentation A4 size (Models with 30 cm depth), and has models with slot. Electronic models include automatic interior lighting.

Its polished dugings and modern aesthetics make the Zafiro series essential.

NEW!

JADE SERIES

Three features define the Jade series: safety, versatility and careful design.

The great variety of sizes and models in which it is presented make these safes ideal for both domestic and business environments. Thinking about businesses, the slot models have been designed, which allow to introduce cash or documentation without having to open the door of the safe.

The blue water colour of its interior contrasts with the grey exterior in perfect harmony, giving it a very aesthetic appearance.

DEPÓSITO

SERIES

The Deposit series has been conceived to respond to the needs of business. These safes have an anti-fishing front drum or a sliding drawer with lock, which allows the employee to deposit valuables in the safe without having to open their doors.

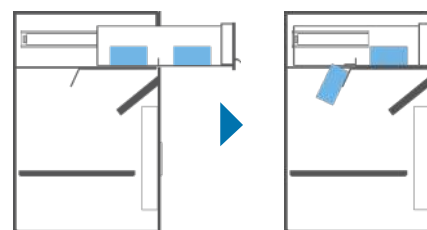

All models are prepared for the "shared opening" function, so that two users can use the safe.

The drawer in the 60-C models has a fixed part and a folding part that tilts when closing it, avoiding that the objects that have been deposited in that area fall inside. They incorporate a slot with anti-fishing device as standard.

DEP E-60-C with sliding drawer

Drawer sizes (mm.)
 Drawer fixed part: 100x290x170
 Drawer moving part: 100x290x170

Drawer models operation.

Features

Door thickness:	8 mm.
Wall thickness:	4 mm.
Bolts:	4 x Ø25 mm 3 sides (5 bolts in DEP E-76-T and DEP L-76-T models).
Colour:	Special mottled gray.
Sliding drawer:	in DEP E-60-C and DEP L-60-C models.
Front tamper-proof drum:	in DEP E-60-T and DEP L-60-T models.
Slot:	150 x 16 mm. (only drawer models).
Anchor holes:	3 wall / x 4 floor - Ø12 mm.
Internal lighting:	With energy saving LEDs (electronic models).

Locking system

L Models (Mechanical):

Lock : Double bitted key in lower compartment. The drawer in C models includes a double bitted key.

CUARZO

SERIES

The Cuarzo series stands out for its robustness and resistance to external attacks. Made of steel, its thickness of 12 mm on the door and 2 mm on the body gives it extra security.

Of sober design, this series is ideal for use in business: its interior dimensions allow to accommodate A4 size documentation (models with 30cm background).

It is also recommended to provide service in homes that require extra security.

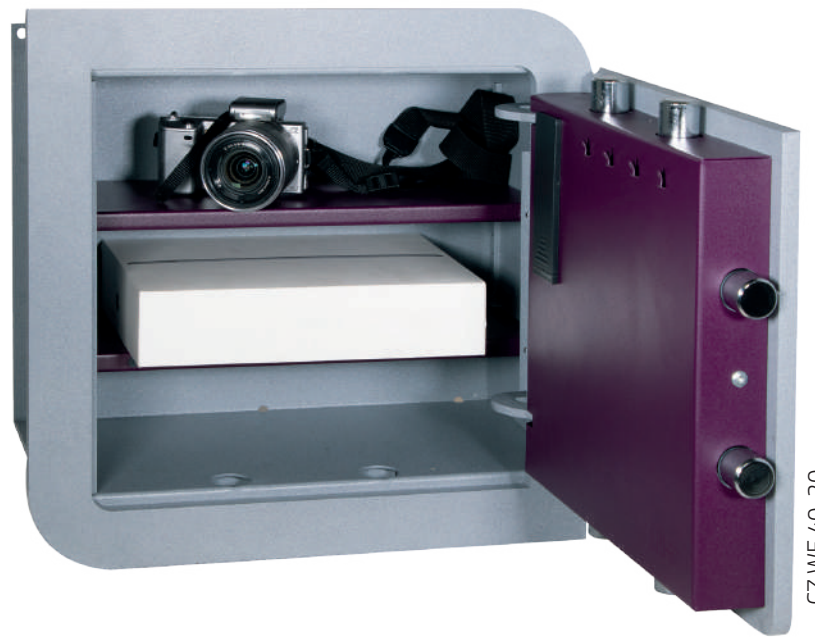

Electronic models include automatic interior lighting as standard.

SERIES CUARZO

RU WE-56-30

RUBÍ

SERIES

Like the precious stone that gives it its name, the Rubí series combines beauty and hardness. Built in steel, its 10 mm thick door and frame and its 2 mm body provide great robustness. The striking violet color of the safes that make up the series and its minimalist aesthetic makes them ideal for use in homes and businesses.

Thinking in this last function, several models with slot have been conceived, suitable for establishments where cash is handled. Also most of the models allow to accommodate folio and AF documents (Models with 30cm depth).

Electronic models include automatic interior lighting as standard.

SERIES RUBÍ

RU WL-40-30

RU WE-56-30

Features

ACM SERIES

GRADE III

ACM-BASIC

High security safes series with Grade III Certification according to the UNE-EN-1143-1 standard. Homologated for 5 short weapons. The armoures that make up this series are built in steel with high resistance anti-vandal concrete, elements that provide great robustness and safety.

ACM-L

Features

- Door thickness:** 25 mm.
- Wall thickness:** 25 mm.
 - Interior and exterior made of steel plates with stainless steel reinforcements.
 - Vandal-proof high-resistance concrete.
- Bolts:** 5 x Ø25 mm + anti lever plate.
- Colour:** Grey (RAL 7039)
- Anchor holes:** 2 wall / 2 floor - Ø15 mm

Locking system

- ACM-L model:** High security VdS Class 2, EN 1300. Keys cannot be duplicated (Option to request more copies on placing order).
- ACM-BASIC model:** High security electronic lock, VdS Class 2 EN 1300 Class B. 2 user codes with 6 fixed digits. Programmable delayed opening of up to 99 minutes, with window opening.
- ACM-PLUS model:** High security double bitted key VdS Class 2, EN 1300. Keys cannot be duplicated (option to request more copies on placing order). Includes re-locking system.

SOLID SERIES

Grade I* LFS 30 P2

Series of Grade I safes of theft resistance according to EN-1143-1 and LFS 30P standards of fire resistance established according to EN 15689. Designed to carry out a double function: protect documents from fire and theft. The increase in temperature inside the safe at 30 minutes is less than 170 °, which guarantees the integrity of the paper, which decomposes from 177 ° C. The lock is reinforced against drilling attacks.

Features

Door thickness:	87 mm.
Wall thickness:	40 mm.
Bolts:	SO E-54 model: 2 + 2 + 2 + x Ø20mm. SO E-84 model: 2 + 2 + 4 + x Ø20mm. SO E-100 model: 2 + 2 + 5 + x Ø20mm. SO E-125 model: 2 + 2 + 6 + x Ø20mm.

Colour: Grey (RAL 7035)

Anchor holes: 1 floor

- Interior complete with concrete resistant to fire and attempted.
- Lock to protect against attacks by drill.

Locking system

Lock :	Security electronic lock certified Class 2 EN-1300.class
Keyboard :	1 user code with 4 to 6 digits. 1 emergency code with 4 to 6 digits.
Power supply :	9V (6LR61) battery. Located in the exterior.

VULCANO SERIES

LFS 60 P

Series of safes certified according to European standard LFS 60P EN15659 for fire resistance. Designed to protect documents, since the temperature increase inside the safe at 60 minutes is less than 170°, which guarantees the integrity of the paper, which decomposes from 177°C. Also ideal for storing valuable belongings that must be protected from theft.

Interior drawer situation:
 · 75-E model: upper part.
 · 120-E and 140-E: lower part.

Features

- Door thickness:** 32-E / 51-E / 75-E models 96 mm.
120-E model 117 mm.
140-E model 96 mm.
- Wall thickness:** 32-E model 51 mm.
51-E model 52 mm.

120-E model 82 mm.
140-E model 70 mm.
- Interior complete with fire-proof concrete.
- Bolts:** 32-E / 51-E models 2 x Ø15 mm.
75-E model 3 x Ø25 mm.
120-E / 140-E models 6 x Ø25 mm.
- Colour:** Grey (RAL 7035)
- Interior drawer** in 75-E, 120-E and 140-E models.
- Anchor holes:** 1 floor.

Locking system

- Lock and keyboard:**
32-E and 51-E models:
Digital keyboard + knob.

75-E, 120-E and 140-E models:
High security lock + digital keyboard+ knob.
- User code plus emergency code with variable length, 4 to 6 digits.
- Power supply :** 4 AAA (1,5V) batteries.
Located in the exterior. Easy to replace.

ALL OF OUR MODELS ARE REGISTERED

European Safe Standards

It was formerly thought that the resistance of a safe deposit box is an attempted robbery was directly related to the weight or the thickness of its walls. Today manufacturers of safes incorporate advanced materials as well as closing elements that have been previously tested in independent sector reference laboratories. The tests consist of the determination of the time needed to access the interior of the safes using various tools. The more time, the higher level of resistance. Depending on the outcome of these trials, safes are classified according to their grade or level of security. Security is no longer a matter of "weight"; but of technology.

In Europe, both insurance companies and the most demanding customers, have begun to use security level classification of the 3 main technical standards of reference (in an attempted robbery or fire). A certified box is a guarantee of a good buy. Organizations accredited to certify this product, such as AENOR in Spain or the ECBS at a European level, perform periodic audits in our factory which guarantee that the manufacturing processes produce products identical to the tested safes in their laboratories.

Standard UNE-EN-1143-1: BURGLARY RESISTANT SAFES

11 resistance grades, from 0 to X, 0 being the lower level and X the highest. From grade V, tests include post-detonation tests. The standard includes anchoring system resistance tests, as well as the requirement of exclusive use of certified locks.

BTV series: Luxor (IV), Thebas (IV), Banca Peso (IV), Gasolinera (IV), Armero ACM (III), Babylon (II), Cartago (I), Armero Protector (I) and Solid (I) certified according to this standard.

Spanish law contemplates the need for installation of grade IV certified safes in certain stores, such as jewellery stores, bank offices, lottery dealers and gas stations.

Q55/ 000043 UNE-EN 1143-1		

Standard UNE-EN-14450: BURGLARY RESISTANT SECURE SAFE CABINETS

2 burglary resistance levels. Focused on safes with robust construction, but lighter than grade 0, according to the previous standard. Level S2 is superior to S1.

BTV series Cuarzo (S2), Rubí (S2) and Ignis (S2) are certified according to this standard.

Standard UNE-EN-15659: FIRE-PROOF

This classifies safes in 2 different levels of resistance according to the increase of temperature in case of fire: 30 or 60 minutes (LFS 30 P and LFS 60P). It guarantees that the inner temperature is under 170°C (documents are always kept below the burn point).

BTV series Vulcano (LFS 60 P), Solid (LFS 30 P), Filing Cabinet Ignis (LFS 60 P) and Fireproof Briefcases (LFS 60 P). Ignis cabinet series is fireproof for 30 minutes according to the standard GOST R50862.

Terms of sale

Safes catalogue 2018

FEES AND PAYMENTS

- The fees and conditions included come into effect on **March 15th 2018** and replace all published before that date.
- All prices are per unit, excluding VAT.
- Delays in payment on the agreed date of expiration, will charges interest rate of 0,75% per month (9% per year).
- OFFERS FOR ONLINE ORDERS: Any orders that clients place through the BTV Client Portal will have a 1% additional discount on the net price of the order. 3% discount for the first order, and cannot be accumulated with the 1%.

PACKAGING

- Packaging is included in the price.
- The price always refers to the number of units or multiple of them in a full package.

SHIPPING

- The shipping is carriage-paid to the client's doorstep at ground level, for orders over the following net amounts per invoice, according to the area:

Spain (peninsula):	200,00€
Ceuta and Melilla:	260,00€ <small>(exportation expenses by the client).</small>
Balearic islands:	260,00€
Canary islands:	900,00€ <small>(exportation expenses by the client).</small>
Portugal:	600,00€
Andorra:	260,00€ <small>(DUA by the customer).</small>
*Other destinations: Please ask our sales department.	

- If orders are under these amounts, shipments will be carriage forward or the shipping costs will be charged onto an invoice. Specifically for shipments to Spain (peninsula), the following fixed amounts are loaded:

Since 50€:	10,00€
More than 50 to 200€:	13,00€
Canary islands:	39,00€ orders from 0 to 300 €
	49,00€ orders more than 300 to 600 €
	59,00€ orders more than 600 to 900 €
Balearic islands:	15,00 € orders from 0 to 50 €
	20,00 € orders more than 50 to 260 €
Andorra:	10 € orders from 0 to 50€
	13 € orders more than 50 to 260€
Portugal:	21,00€ orders from 0 to 300€
	30,00€ orders more than 300 to 599€

MINIMUM ORDERS

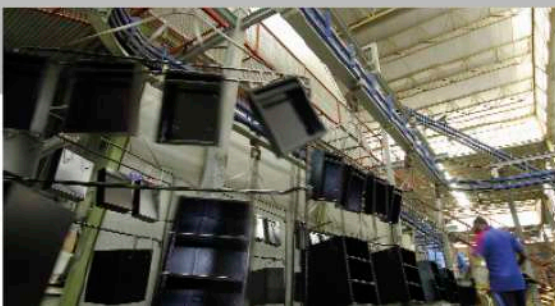

- BTV DOESN'T establish a minimum amount per order.

RETURNING GOODS

- We will only accept returned goods that are clearly identified with the AUTHORISED RETURN CODE, which the client must request from BTV before sending the goods back.
- Special, customised or discontinued products cannot be returned.
- BTV will manage the return transport if the reason for returning the product is attributable to BTV.
- For returns attributable to the client, returned goods will only be accepted during the first 15 calendar days after shipping goods.
- In case of returns for reasons attributable to the client, 90% of the value of the original product will be refunded, but only if the product is returned in good technical conditions and its original packaging. If products returned are damaged or do not include the original packaging, at least another 20% will be knocked off.
- The client must make sure that the goods are in perfect condition before signing the delivery note. After shipping, the client is responsible for the condition of the goods and will have 24 hours to make a claim to the agency if there are any damages caused during transportation. If BTV or the agency does not receive any claims in this period of time, the client will have to pay for the repair.
- To make a claim for goods damaged during transport, the client must send a photograph of the damaged goods to our factory. This photograph will make the damage assessment easier, and will facilitate refund or a new estimate for repair.

MODIFICATIONS ON PRODUCTS

In order to improve constantly, the company reserves the right to modify any of the technical features or looks of its products at any time. The features that appear in the catalogue are for illustrative purposes and are not binding. Therefore, any diagrams, figures, dimensions, weights or any other information in the catalogue will only be binding if they have been agreed in writing.
